## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114 was filed in this application after a decision by the Board of Patent Appeals and Interferences, but before the filing of a Notice of Appeal to the Court of Appeals for the Federal Circuit or the commencement of a civil action. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on August 14, 2003 has been entered.

Claims 3-5, 8-9, 12, 14, 17, 19-20 and 22-24 are pending.

### ***Claim Objections***

Claims 3, 8-9, 12, 14, 17 and 19 are objected to because of the following informalities: the recitation of "100°" should read -- 110° -- as originally filed. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3-5, 8-9, 12, 14, 17, 19-20 and 22-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Gammons et al. Figures 1 and 4 disclose the border seal being "rippled with no sharp changes in direction (curvilinear ripples)." Figures 1 and 5 disclose the fence being

“rippled with no sharp changes in direction (curvilinear ripples).” Regarding claims 17 and 19, Gammons et al (column 1, lines 11-13) discloses a system comprising a heat transfer device; and pump in combination with a heat exchange panel.
